## Projects

### ○ [dollargeneral.com Website-clone](#)

It's a US-based company which provides you with a hassle-free shopping. You can search or buy products like foods, vegetables and other food product online and go to that particular store and take your product. This website is not responsive. It's a group project where we've used JavaScript, HTML, CSS to build this website.

- **Features:** Sign-up || Sign-in || product filtering according to price || Add to Cart || Admin Section || etc.
- **Tech Stack:** HTML || CSS || JavaScript

### ○ [firstcry.com Website-clone](#)

This is an E-commerce website. Where you can search and buy all the product which are related to babies. It is a collaborative project. This is a very famous website in India. We have used JavaScript, HTML, CSS to build this website with our creativity along with fronted and backend integration it's Fully Responsive.

- **Features:** Sign-up || Sign-in || Product filtering according to the brands, price and rating || Add to Cart || Etc.
- **Areas of Responsive:** Home page|| Product page || Inner product page || Add to Cart || Sign-in || Log-in.
- **Tech Stack:** HTML, CSS, Bootstrap, JavaScript.

### ○ Rest API JAVA

A Basic Java Rest API for the adding course. You can add Course details like id, course name, and course description. I used Java, spring boot, maven, and MySQL for the database to build this API.

- **Features:** Add details id, course name, course description
- **Tech Stack:** Java, spring boot, maven, MySQL

## Experience

### Web Development Intern InternPe

 August 2023 - September 2023

 Remote

- Developed and created user interfaces with JavaScript, HTML, and CSS which improved user satisfaction.
- Learned multiple new things like MySql, JavaScript new concepts and how to manage development in the real industry projects.
